

## ATLANTA BELTING COMPANY

# Products for the Concrete Industry

When you need industrial supplies for your concrete production facility, please consider Atlanta Belting Company, Inc.

ABCO has been a leading supplier of belting to Southeastern industries since 1923! Let us help you choose belts that fit your applications and provide the maximum possible belt life.

In addition to belting we can supply the following items: Hydraulic hose assemblies, dry material pump-off hose, hot air hose, skirt rubber, pulleys and idlers, gum discharge boots, water hose assemblies, v-belts, cam & groove couplings, general purpose red hose, and belt vulcanizing.

We also stock sheets, rods and bars of UHMW plastic and can custom machine your plastic parts in house.

Atlanta Belting Company caters to the fast-paced concrete industry with heavy rubber belting, vulcanized endless on site or with belt fasteners installed. We provide rollers and idlers, including those made with self-lubricating UHMW plastic which offer a degree of insurance because they do not rip belts as metal idlers can. We also stock UHMW in sheets and rods, which can be cut and machined to make bushings and wear plates. Please call us today for your belting and plastic needs!

- Hose
